

**Dr Siwei Cheng**

Associate Professor of Sociology  
Arts and Science  
New York University

**Biography**

Dr Siwei Cheng is an Associate Professor of Sociology in New York University. She received her PhD in Sociology and Public Policy (2015) and MA in Statistics (2012) from the University of Michigan, and received BA in Economics and Mathematical Statistics from Peking University (2009). Prior to joining New York University, she was Assistant Professor of Sociology at UCLA (2015-2016).

Dr Cheng's research encompasses various areas of inequality, mobility, labor market, and quantitative methodology. Her work employs a broad array of methodological approaches, including causal inference, panel data methods, discrete choice models, network analysis, machine learning, and survey experiments. Dr Cheng's work has been published in leading social science and general science journals, including the American Journal of Sociology, American Sociological Review, and the Proceedings of the National Academy of Sciences (PNAS).
